DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group 1 and the flat panel in Paper No. 7 is acknowledged. Claims 3 and 10-20 have been withdrawn from consideration because the applicant has not included these claims in the group readable on the elected species. The claims to be examined are limited to those claims defining elements of the invention clearly drawn to the elected embodiment. The Examiner has reviewed the application and has withdrawn claim 6 from consideration because the claim is drawn to a curved panel. The applicant traverse of the restriction is based on the argument that the inventions are related. However, an escutcheon is with formations to engage a panel is not the same field of invention as the door assembly of claims 12-20 and because no generic claim has been found patentable the restriction is made final.

Information Disclosure Statement

The information disclosure statement complies with 37 CFR 1.98(a)(1), listing of all patents, publications, or other information submitted. However, the date provided should be at least the month and year of publication in the form MM/YYYY. The day of the publication can be omitted.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language of the claims must clearly distinguish the elements of the claims. Therefore the surface of claim 9 must be clearly distinguished as the mounting or guide surface.

Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 2, 4, 5, 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mason in view of Eddy et al. Mason is cited showing a panel assembly for a door having a mounting surface panel 26 with a lower edge 118 having a formation 96 and a lip 94 forming a slot for receiving a panel. Mason fails to show formations formed as ribs

with angled lower surfaces. Generally the shape of an element is considered an obvious matter of design choice for one having an ordinary skill in the art. Here Eddy is cited showing a panel with an edge 48 and a panel with a slot formed by a lip 81 and ribs 83 for the purpose secure engagement of the panels. Since the references are from the same field of endeavor the purpose of Eddy would have been obvious in the pertinent art of Mason at the time of the invention it would have been obvious for one having an ordinary skill in the art to have modified Mason with a panel slot formed between a lip and ribs for the purpose secure engagement of the panels in view of Eddy.
